

Remote Site Management, Delivered

For Construction Development & Property Management — the security checkbox, upgraded

Hafen turns the site security your insurer already requires into the management platform your project deserves: AI-powered surveillance, a private encrypted WiFi network across your entire site, and up to 60 days of instantly scrubbable video — deployed in about 48 hours, fully self-powered, at the same monthly cost incumbents charge for a camera on a trailer.

75%+

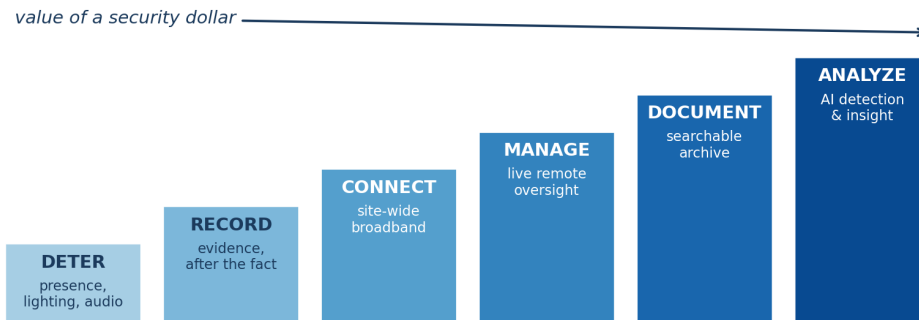

of stolen construction equipment is never recovered once it disappears (NER/NICB) — a passive camera on a trailer doesn't change that number. An AI watch with real deterrence does.

THE REALITY YOU MANAGE		THE HAFEN ANSWER
Guards cost a fortune and recover nothing. A 24/7 post can run \$500K a year — and 75%+ of stolen equipment is never recovered.	→	Every angle, all night, for a fraction of one post. AI watch with floodlight and audio response, recording in high-resolution 4K — deterrence that never blinks.
You manage by windshield time. Progress checks, delivery disputes, milestone verification — hours of driving for minutes of looking.	→	Every site, live, on one screen. Fluid real-time video from any device, 60 days of scrubbable history, and time-lapse for your marketing reel.
Security equipment makes your project look bad. Bulky industrial trailers read as “crime scene” on a premium development.	→	Hafen looks like it belongs. A compact, high-end unit — deployed in ~48 hours, relocated as your site evolves.

The HafenNet™ Platform

Advanced technology, simple platform — everything your site needs in one deployment

The Capability Ladder: What a Site-Security Dollar Can Buy in 2026

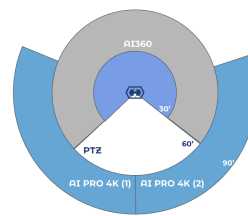

Not one camera. One network. Most job-site cameras stop at “deter.” HafenNet runs the whole ladder on every unit, and meshes unlimited HafenPoint™ units into one network per site — each covering ~½ acre, on camera-monitored sites already shown to cut crime 51% (40-yr meta-analysis).

Everything included. One subscription.

- ✓ 4K AI cameras: 360° coverage, night vision, PTZ control
- ✓ AI detection of people, vehicles, plates & sounds
- ✓ Real-time alerts (text/email) with scheduling
- ✓ 60-day scrubbable archive + secure cloud export
- ✓ Two-way audio with motion-activated deterrence
- ✓ Private encrypted site-wide WiFi — customer-governed
- ✓ Fully self-powered, fault-tolerant 24/7 operation
- ✓ Unlimited HafenPoint™ expansion per site
- ✓ Multi-site portfolio view; web portal + mobile app
- ✓ Turnkey: install, service & support — one subscription

A closer look: dual 4K PTZ cameras, floodlight, and antenna array — 25 ft up.

AI360° detection with dual 4K PTZ — engagement out to 90 ft, one unit covering ~½ acre.

1 SITE SURVEY

Send the site plan — coverage design and quote within days

2 48-HOUR DEPLOY

Shipped in, mast up, live — no trenching, no wiring, no disruption

3 MANAGE ANYWHERE

Web and mobile access for your whole team from day one

Built where the industry is headed — aligned with nine of the ten 2026 SIA Security Megatrends.

Deployed in ~48 hours. Moved when your site changes. Removed when the project ends.

Terms from month-to-month to 24 months — the longer the term, the better the rate.
